

2022-23 Logic School Science Instructor, 8th Grade

Program Description: This position is a middle-school science instructor role with an emphasis on introductory physics. Instruction will capitalize on middle school students' natural tendency to question and test what they are learning and is deliberately structured to encourage development of critical and abstract thinking skills. Classes are discussion-based with an emphasis on recognizing causes and effects, to further the students' understanding of logic and debate as part of the overall Logic School experience.

Essential Requirements:

- Must be a follower and disciple of Jesus Christ
- Support the School's Statement of Faith fully and unreservedly
- Have a passion for teaching and a love for middle school students
- Experienced educator trained in instructing and discipling middle school students
- Hold a Bachelor's degree or higher in science

Preferred Experience and Abilities:

- Knowledge of and experience with the philosophy of classical Christian education
- Five years teaching experience in middle school science
- State issued Teacher's Certification in 6-8 grade sciences
